Information is subject to change without notice. Northern Telecom reserves the right to make changes in design or components as progress in engineering and manufacturing may warrant. This equipment has been tested and found to comply with the limits for a Class A digital device pursuant to Part 15 of the FCC rules, and the radio interference regulations of Industry Canada. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses and can radiate radio frequency energy, and if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at their own expense.

SL-1 and Meridian 1 are trademarks of Northern Telecom.

## Revision history

---

**January 29, 1990**

Standard, release 1.0.

**February 28, 1990**

Standard, release 2.0.

**July 31, 1990**

Standard, release 3.0.

**December 1, 1991**

Standard, release 4.0. This document is reissued to include technical content updates. Due to the extent of changes revision bars are omitted.

**December 31, 1992**

Standard, release 5.0. This document is reissued to include information on system option 81 and equipment required for compatibility with X11 release 18. Only new information and changes to technical content are noted by revision bars in the margins.

**April 1, 1993**

Standard, release 6.0. Changes to technical content are noted by revision bars in the margins.

**August 1, 1993**

Standard, release 7.0. Changes to technical content are noted by revision bars in the margins.

**April 1, 1994**

Standard, release 8.0. Added references to option 61C switch.

**December 1994**

Standard, release 9.0. This document is reissued to include updated information on the small system multi disk unit (SMDU), Meridian 1 option 51C, and other minor updates. Changes to technical content are noted by revision bars in the margins.

**July 1995**

Standard, release 10.00. Added references to Option 81C switch, added international information to create a global NTP, and other minor changes. Changes are noted by revision bars in the margin.

**December 1995**

Standard, release 11.00. Corrections to text and figures.

**August 1996**

Standard, release 12.00. Updated to include references to X11 software release 22. Changes are noted by revision bars in the margin.

**October 1997**

Standard, release 13.00.
